

Product Name: Magtrap™ <Magnetic separator>

Code No.: DD100

research use only.

<Kit components>

Component	Quantity	Storage
① Magtrap™ <Magnetic separator>	1 kit	RT

<Storage condition>

Store at room temperature.

Do not autoclave Magtrap.

Keep objects that could be damaged by magnets away from the working area. Handle Magtrap with care and avoid contact with other magnets.

<Description>

Magtrap is a magnetic bead separation rack which can pull magnetic particles to the tube wall. Magtrap holds 6 (1.5–2 mL) microfuge tubes with 3 positions on each side of the rack. The removable sample rack on the magnet base allows for vortexing, rotation, or manual sample shaking, making it easy to process samples.
